DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed on December 21, 2005, with respect to claims 2-7 and 10-12 have been fully considered and are persuasive. The rejections of claims 2-7 and 10-12 have been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 2-7 and 10-12 are allowed.

As for independent claim 11, the prior art, alone or in combination, does not teach or fairly suggest a receiver comprising receiving means for receiving a digital broadcast signal; selecting means for enabling a user to manually select real channel information corresponding to a number of programs from information of a plurality of real channels; program information extracting means for extracting program information of said plurality of real channels from said digital broadcast signal received by said receiving means; user profile creating means for creating on the basis of the selected real channel information from said selecting means and said program information extracted by said program information extracting means a user profile in which program information are accumulated as user profile information; and virtual channel guide creating means for creating a virtual channel guide in which programs are located by utilizing said user profile; wherein said virtual channel guide creating means locates a program

Art Unit: 2614

into a virtual channel only when its corresponding time is not overlapped with any program located in said virtual channel, and shifts to a consecutive virtual channel when overlapped.

As for the most pertinent prior art of record, the Herz et al (USPN 5,758,257) patent teaches or discloses that, “Although the customer may define time windows which conflict with each other, in terms of overlapping and containment, only one of the windows in the conflicting set can be used in the final assignment.” (see col. 22, lines 52-54). Customer profiles and content profiles are used to develop “virtual channels” so that the customer can view the video programming predicted to be most desirable to that customer (col. 22, line 64 - col. 23, line 1). “The “virtual channels” may be displayed on dedicated channels, or the recommended programming may be highlighted directly on the electronic program guide or displayed on the customer’s screen as recommended programming selections.” (col. 23, lines 1-5). “Also, the channels may be reprioritized for presentation on the electronic program guide on the basis of the calculated “virtual channels”.” (col. 23, lines 5-7). However, the Herz patent does not teach or disclose all of the claim limitations including a receiver comprising a “virtual channel guide creating means...wherein said virtual channel guide creating means locates a program into a virtual channel only when its corresponding time is not overlapped with any program located in said virtual channel, and shifts to a consecutive channel when overlapped.” In the Applicant’s invention these features are specifically disclosed in claim 11 (renumbered as claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
